

Phil C. VanOss

Lean Practitioner

Phil VanOss is a results-oriented business professional with more than 20 years of Business Consulting experience and 14 years of manufacturing management experience. Phil worked with MTEC as a consultant, account manager, and project manager with a variety of clients from small start-ups to large multi-national companies providing growth services, Lean training and implementation, process improvement and cost reduction efforts, design, development, and deployment of Internet business strategies and eBusiness applications, and information systems support.

Phil brings the unique combination of “Lean” Office, Health Care, manufacturing expertise, Internet business, and information technologies experience. He is certified in the implementation and training of “Lean” business practices and is a primary provider of process improvement, quality improvement, waste reduction, and cost-cutting initiatives at client companies. Phil continues to accumulate a strong list of satisfied “Lean” clients in an array of industries. In addition to “Lean”, his list of accomplishments includes the successful design and implementation of information systems, Internet Business applications, manufacturing plant operations, budgets, materials management, production planning, laboratory and technical services.

Phil holds a BS in Industrial and Operations Engineering, University of Michigan, 1982 and is a Certified Lean Practitioner by MEP and SME. He resides with his wife Sue in Hopewell Junction, New York.
